

BUREAU VERITAS FRANCE AT THE INCYBER EUROPE FORUM

Paris, March 22, 2024 – The InCyber Europe Forum, to be held at the Grand Palais in Lille from March 26 to 28, is the premier European event on digital security and trust.

Organized by General Marc Watin-Augouard, Founder & Guillaume Tissier, CEO, the InCyber Europe Forum brings together the entire cybersecurity and "digital trust" ecosystem for three days: end clients, service providers, solution developers, consultants, law enforcement, and government agencies, schools, and universities... The Forum has the dual mission of addressing the operational challenges of cybersecurity and contributing to the construction of a digital future that aligns with European values and interests, especially in the context of the new European directive for businesses: NIS 2.

Experts from Bureau Veritas France will be present for the third consecutive year, at booth D17, to showcase their cybersecurity services offered to businesses: diagnostics, audits, training, certification... a comprehensive range of services to help large groups, SMEs, and micro-enterprises better address cyber risk.

It will be possible to participate in a Bureau Veritas demonstration at booth D17 of the OT Hack Box, a way to highlight the vulnerabilities of Operational Technologies (OT) and hacking. The purpose of the demonstration is to hack into an industrial environment, a playful way to better understand the consequences of a lack of cybersecurity measures and to get a glimpse of the possible corrective measures for the observed attack trajectories.

You can also attend a roundtable in which Bureau Veritas France is participating:

- **Wednesday, March 27, from 11:15 am to 12:15 pm (TR05): "How to assess and standardize the security of AIs?"**
